

The FCC needs to act on behalf of American citizens. Sinclair Broadcasting is using public airwaves to alter public opinion specifically for thier own means. This is clearly violating our laws. Public broadcasts made by stations using free public airwaves have an obligation to give accurate and unbiased information. Obviously showing anti-canidate programs days before a major election is indecent and bigoted. I expect that you are working to settle this gross injustice. The American public will be mindful of your actions.
Best regards, Philip Holt
